Deniz Pottery

Introduction

Welcome to Deniz Pottery!

We are proud to introduce you to Deniz Pottery, a family business with a rich heritage spanning eight generations of master potters. Pottery in our family dates back to the 18th century. Originally, our family name was Desticioğlu, which means "potter's son." However, our great-great-grandfather, deeply inspired by his love for the sea, made the significant decision to change our family name to "Deniz," which means "sea" in Turkish.

We continue to honor our ancestral legacy by creating exquisite, handcrafted pottery that blends traditional techniques with contemporary designs.

Our commitment to quality, artistry, and innovation ensures that each piece we produce is not only a work of art but also a testament to our family's enduring passion for pottery.

About Us

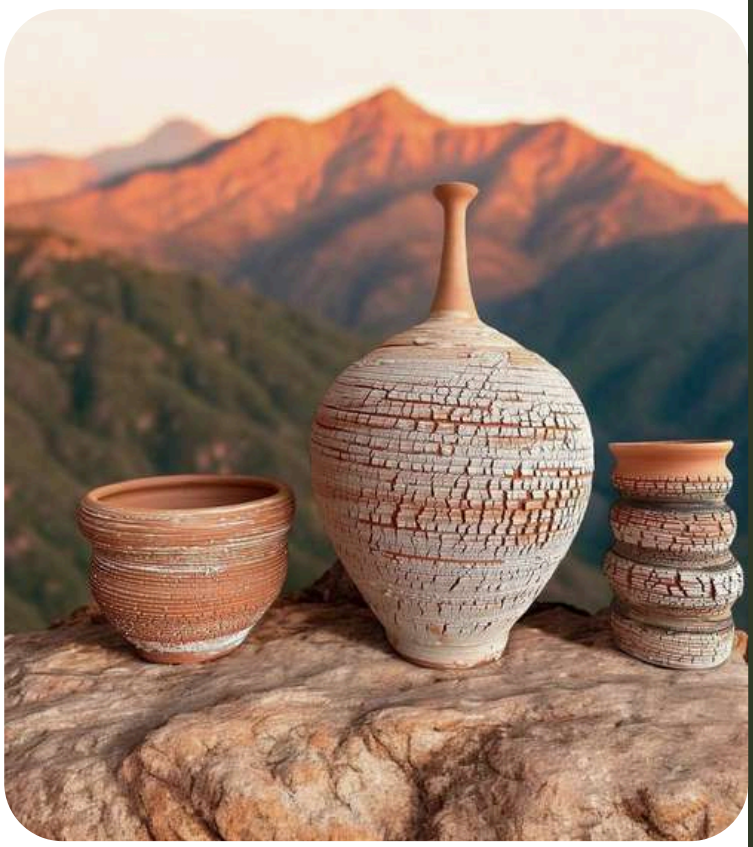

Deniz Pottery is established on a 4-acre site dedicated to the art of pottery, with a rich history that includes traditional pieces from the 19th and 20th centuries, such as ancient jars and pitchers. Our primary focus is on terracotta, but we also produce a diverse range of pottery items using 7-8 different types of clay. Our extensive product line features hundreds of unique items, produced in quantities reaching tens of thousands, catering primarily to wholesale markets. We also offer custom-sized products to meet specific requirements. All our products are handmade, ensuring unique and high-quality pieces.

Over the years, we have collaborated with numerous prominent companies, establishing a reputation for quality and reliability. Our products are crafted with exceptional skill and high-quality materials, combining aesthetics with durability to meet our customers' needs.
